

# YOUR VOICE

The Pandemic has been really hard  
For so long..

We want to know about what you experienced.

Somehow – all of us managed to go through those uncertain days.

## How did you go through it?

What do you think helped  
you?

And what was hard for you?

People around the world, might have felt the same challenges you did. **Imagine you had the power today, to change things for the better.** Think of your home, your school, and news you read and heard during the Pandemic, about things that were happening around the world.

**Imagine if you could tell world leaders how they can support children and young people around the world, better.**

**What comes to mind?**

**What are the things you wish to see?**

**What are the things you want to say ?**

**What do you want the people in power to do,  
to help us become stronger after the Pandemic?**
